

EliteXL^{VWH}

HOT WATER SUPPLY BOILER

Direct vent up to 150 feet (2,000,000 Btuh Units) and up to 125 feet (399,000 to 1,000,000 Btuh Units) using PVC, CPVC, Polypropylene or Stainless Steel

The **4 pass heat exchanger** with large internal circuits reduces pressure drop, allowing the unit to be used in variable flow system

Durable **316L stainless steel** construction pressure rated at 160 PSI bears the ASME Stamp

Combustion System - **10 to 1** turndown

7" High Resolution Touchscreen

Cascade sequencing up to **8 volume water heaters** – Redundancy of operation (no downtime) – providing a much larger turndown ratio and increasing the overall system efficiency and performance with unit runtime rotation

HTP LINK - A WiFi solution that enables remote monitoring of the appliance and system

**Up to 6 Inputs From
399,000 to 2,000,000 Btuh**

98% Thermal Efficiency

6 Sizes: 399,000 Btuh to 2,000,000 Btuh

Contractor Approved Sizing!

Space should never be compromised to obtain a desired output. The HTP high efficiency Elite XL Volume Water Heater was engineered with contractor accessibility in mind. This powerful volume water heater has a 4 pass heat exchanger designed to increase heat transfer while allowing for a small footprint. Compared with the industry norm, the Elite XL's size advantage makes installation in smaller spaces a reality.

The Industry Norm VS Our 2 Million Btuh Unit VS Our 1 Million Btuh Unit

EliteXL^{VWH}

A CLOSER LOOK

Why BLUEJET?

Patented Blue Jet Combustion burner technology, low NOX operation and a unique design provide a uniform stable flame for years of trouble-free operation, while avoiding clogging and hot spots normally seen on other premix burners.

- Highest Quality Stainless Steel Heat Exchanger
- The Highly Efficient 4 Pass Heat Exchanger Design Multiplies the Heat Transfer
- Reduced Pressure Drop Allows for Small Pumps, Reducing Installation Costs

EliteXL V W H A LOOK INSIDE

- 1** The 4 Pass Heat Exchanger Design Multiplies the Heat Transfer:
- 1a** - The domestic heating fluid-return makes the 1st pass, heating up, in the inner stainless steel tubes of the condensing chamber.
 - 1b** - The domestic heating fluid makes the 2nd pass, picking up even more heat in the outer-tubes of the exhaust chamber.
 - 1c** - The domestic heating fluid makes the 3rd pass, multiplying the heat in the outer-tubes of the burner chamber.
 - 1d** - The domestic heating fluid makes the 4th and final pass, on the domestic supply, maximizing the heat in the inner-tubes of the burner chamber.

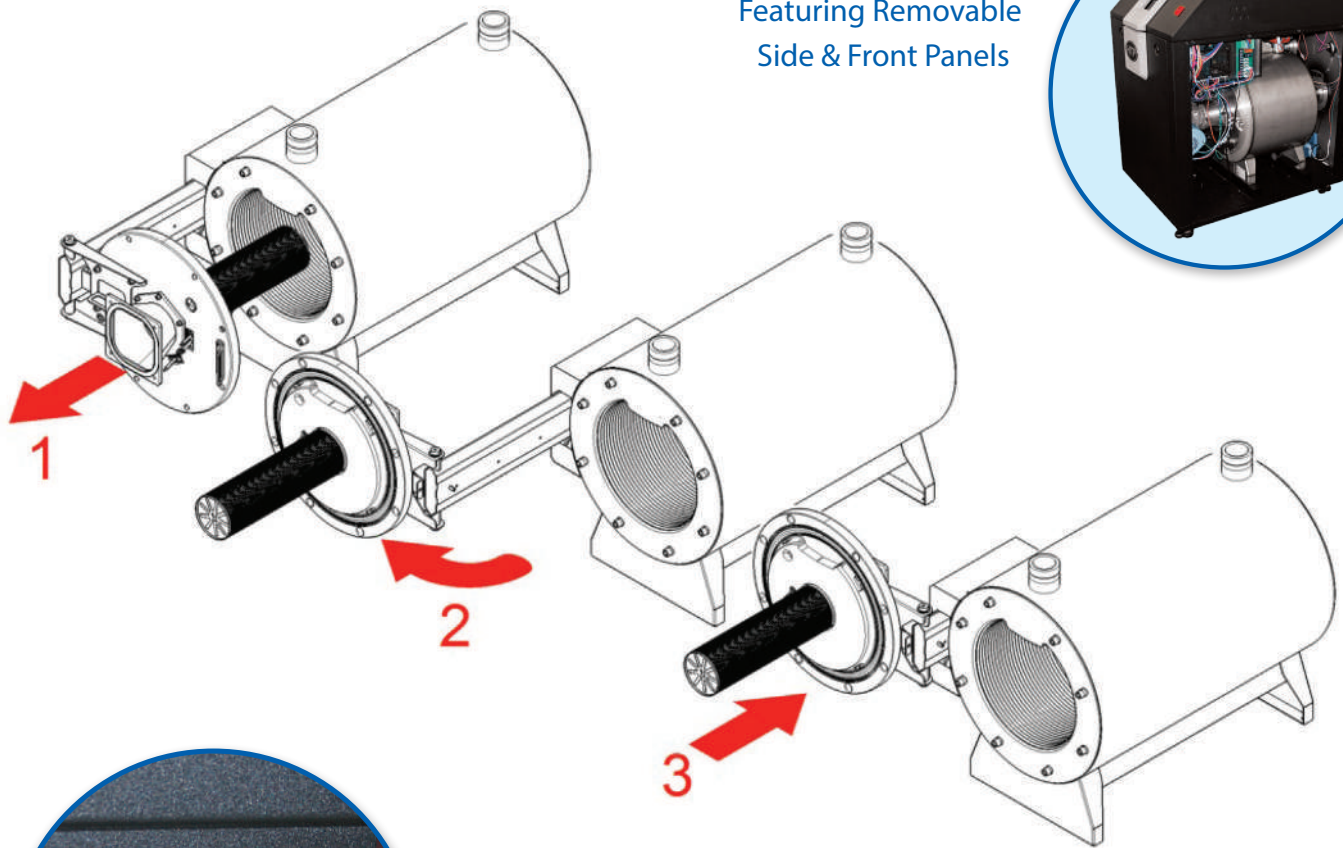

- 2** Burner Sight Glass
- 3** Domestic Return
- 4** Domestic Supply
- 5** Condensate Drain

MAKING SERVICEABILITY EASIER

Our talented team of design engineers oversaw every aspect of the Elite XL including the combustion assembly with a unique hinged sliding door, which is ideal for complete access when maintenance is necessary (2 mil Btuh). In 3 easy steps the combustion assembly is accessible. Simply slide, swing and secure.

Featuring Removable Side & Front Panels

1. Slide 2. Swing 3. Secure

Moves Easily

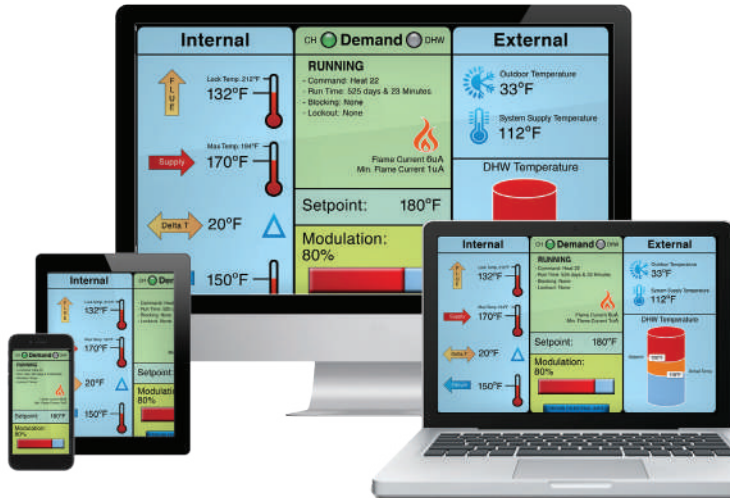

Footmaster wheels on the 399K - 1,000K models eases moving the VWH and locking it in place

HTP LINK

Multiple Platforms on the Cloud

Technical Support

Remotely link to a factory technician to assist in system monitoring, troubleshooting and overall system efficiency.

Building / Property Manager

Remotely link to monitor multiple units in multiple locations. Get text and email alerts to critical system events such as faults. Continuous system monitoring optimizes system performance and efficiency.

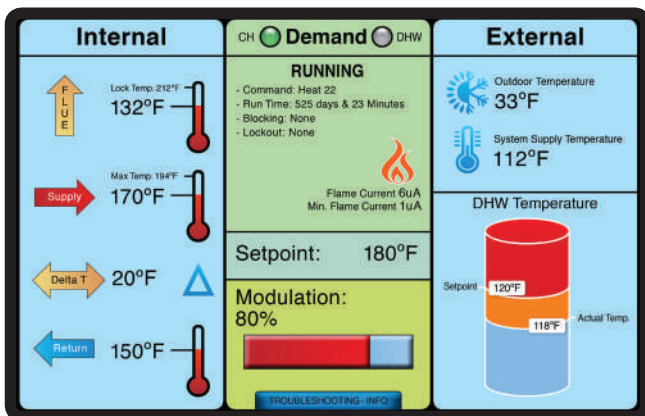

Contractor / Maintenance

Receive text and email notifications and remotely link to assist the customer with system issues. Get key information to quickly and efficiently troubleshoot before arriving on the job.

The HTP Link Touch Display

Take Total Control of Your Heating System

Each Elite XL comes with a **High Resolution 7" Touchscreen**

THE TOUCHSCREEN DISPLAY

7" High Resolution color touchscreen display provides clear visual monitoring of the unit's parameters and programming to maximize the efficiency of the unit. Display screen color will change to help clearly identify the status of the unit, making monitoring and troubleshooting easy.
